

## Contain-It-Junior

**Low Profile! Drums sit only 6" off floor for easy filling and pumping!**

This poly spill pallet offers the lowest fully contained support structure available in a stand alone two-drum configuration. The internal support structure bears the load, not the sump walls! Store loads to 6,000 lbs. The Open Design promotes easy inspection and direct access to spills without moving the drums!

Open designs make for easy clean-ups!
