

## Contain-It-Plus

Open designs make for easy clean-ups!

**Sturdy spill pallets for safe drum storage!**  
**Load drums 4 at a time! For use with or without transport pallet.**

Maintain productivity! Satisfy government regulations! Avoid costly cleanups! Your wood transport pallet becomes a "removable platform"; reduce drum or product handling. The open design allows for easy inspection and direct access to spills. The internal support structure bears the load, not the sump walls! Store loads to 6,000 lbs. Lift spill pallet fully loaded. Low profile adds stability and easy access to tops of drums.

Lift fully loaded with pallet in place.
