

## Overpack 95 Salvage Drum

Our Poly-Overpack 95 meets Group 1 packaging standards and salvage drum regulations (unlike competitive overpacks). The Poly-Overpack 95 safely contains a wide range of hazardous materials—including acids, corrosives and damaged parts—in 55-gallon drums. Tight, secure and leak-free container closing is simple: just place any long object, like a wooden two-by-four, in the handy lid slots and turn it to screw the lid down tightly. Meets performance-oriented packaging requirements of U.S. DOT and UN regulations.

- Twist down lid for safe closure. Closed cell gasket in lid helps seal closure.
- Patented castellations in lid allow for easy closing with pole or two-by-four. Double wall lid gives added strength.
  - Molded area allows for easy gripping.
- 100% UV protected polyethylene provides protection over a wide range of chemicals

Drum lifter lifts and lowers 55-gallon drums with ease! Safely lifts steel drums up to 1,000 lbs. and fits both open- and closed- head designs. Tension spring adapts to diameter of drum. (Product No. 3100-BU)

Can be moved with standard material handling equipment

Drum truck portable.

Nestable design for efficient storage.
