

Space Saver

Add mobility for difficult locations!

No Lift? Transport drums easily from delivery truck to storage.

Perfect for locations without lifts! Heavy duty steel overstructure receives drums from delivery trucks then rolls to storage location where the poly sump is slid under to catch any leaks or spills. Ideal for tight spaces and small rooms where lifts can't reach. Store loads to 2,000 lbs. The open design promotes easy inspection and fast cleanups!

Specifications	Space Saver	Space Saver Cover
