

Poly-Rack System

**POLY-RACKER**

The centerpiece of the Poly-Rack System is the Poly-Racker, a unique, one-piece polyethylene rack that holds two 55-gallon drums securely in place. A massive 100-plus gallon containment sump ensures spill safety even in worst-case drum leaks. And the deep dispensing well easily holds 5-gallon pails while containing incidental spills and splashes in a ribbed bottom without contaminating the sump. Dispensing wells have a scalloped edge so pails can be easily removed. Two (2) drain plugs standard. Poly-Racker can be transported by forklift as separate pieces.

**POLY-STACKER**

Combine a single Poly-Stacker with Poly-Racker to stack up to four drums. Add another Poly-Stacker and you have a storage system that holds six drums and is rated to hold 3,000 lbs UDL. Each Poly-Stacker holds two 55-gallon drums and can quickly be stacked with a forklift. Any spills from the second and third levels fall into the dispensing well for containment and easy clean-up. Combined, Poly-Racker and Poly-Stacker make up the most efficient drum storage and dispensing system you can buy.

**POLY-SHELF**

Save money-prevent spills! Increase safety and productivity when you add the Poly-Shelf to your Poly-Rack System. It easily attaches to a Poly-Stacker and allows simultaneous dispensing from all drums. Spills? A hole in the bottom of the Poly-Shelf drains into the dispensing well in the Poly-Racker.

**Universal Well-Liner**

The Universal Well-Liner provides extra spill protection. 3/4" spout recommended.

**Loading is Easy!**

1. Secure drum with proper cinch strap and lift drum with forklift.

2. Guide drum and orient onto the Poly-Racker.

3. Once drum is placed securely on the Poly-Racker, remove cinch strap and back away.
