

DIKE WALL CONTAINMENT SYSTEM

Containment Corporation - (800)235-7421 - www.ContainmentCorp.com

OBJECTIVE:

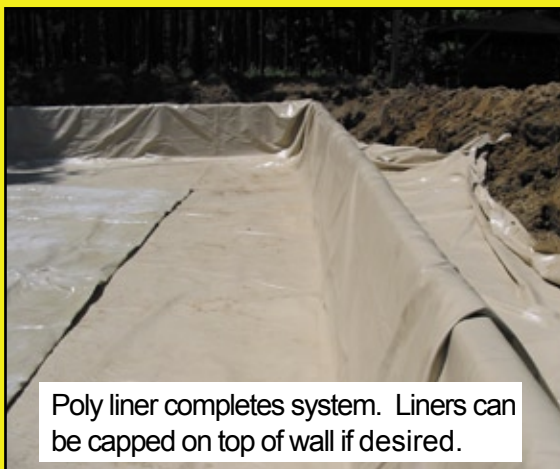

To provide a heavy-duty, re-useable, Fuel Bladder containment system that will withstand a catastrophic bladder failure, yet is easy to install without special equipment. Able to ship on a single A.F. pallet; set up in minutes.

Wall panels are easy to lift into position. No special tools required.

Closed end adds structure to each joint.

Poly liner completes system. Liners can be capped on top of wall if desired.

ADVANTAGES:

- Rapid deployment; Sets up on any level surface.
- Stores & Ships compact. Sections nest to 2".
- Modular: Configure in various Sizes & Shapes.
- Set up & Break down in minutes.
- No special Lifting Equipment or Tools required.
- Re-usable. Rugged construction for long-term use.

WITHSTANDS CATASTROPHIC BLADDER FAILURES

Patent pending cable and wall design has been demonstrated to with-stand 5000 lb. hits when fuel bladders experience catastrophic failures.

SYSTEM COMPONENTS:

- Wall Panels – Dia. 36" High, 8' Long, wt. 120 lbs.
- Cables – Configured to specific sizes. Pick up load when walls are hit.
- Corner Caps – Join walls together, add strength.
- Pins, & Ground Stakes – Quantity based on size.
