

33,000g Reservoir with 3 stage Clarifier and Imbibitive Technologies passive shut-off system in case of major fuel spill.

Rugged, one inch thick fiberglass composite construction. System ships flat, assembled on site. Maximum UV and weather resistance for long life!

Imbibitive Tech. "passive" shut off system is installed in the 3rd stage of the Clarifier. Allows rainwater to pass through while removing hydrocarbons. Will shut outlet down in event of a large spill.

Surface mounted on compacted gravel substrate, this stand alone system was installed in 5 days with components shipped in on a flatbed truck. Covers can be added.
