

STORAGE BUILDINGS

Hazardous Material Storage Lockers:

Currently in use by numerous Cities, Counties, Federal Government and Private Agencies

NEW Non-Combustible and Fire Rated Roll-Up Doors

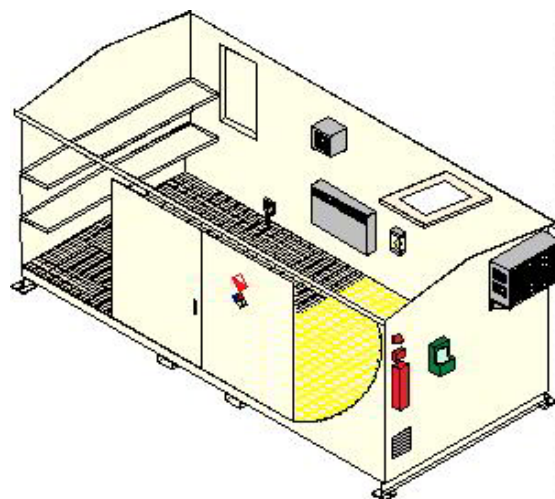

Lockers feature 10, 12 and 14 gauge steel. Ground Connection adds an extra measure of safety. Easily inspected secondary containment exceeds EPA 40 CFR requirements for leaks and spills. Interior & Exterior chemical resistant epoxy paint prevents corrosion. Exterior polyurethane top coat provides protection from the weather. Seismic tie-down pads comply with Seismic Zone 4 regulations.
